

Tips:

There are three possible endings. Details on how to reach the 'true ending' are covered at the end of this guide.

You'll always be paired with Kanda for your first mission. Make your choice carefully, so you can unlock the other characters on the way. Some items will disappear from your inventory between replays.

You must have a character's Level 2 Technique before you'll be able to obtain their Level 3 Technique.

The main walkthrough follows the first playthrough, in numerical order with the canon partners. You can substitute their names for whoever you choose as a partner. Search by chapter name and use the item summaries to help you on replays.

This walkthrough covers the basics of how to play. Try to use it as a guide rather than an instruction manual, as I've skipped all 'non-essential' scenes.
